

The care candidates will be of a generally high standard as all our students have to undergo a college internal test before they can be sent out on placement. They will also have passed the **IELTS English Language test** at a good level (we require an average score of 6 and a minimum score of 6 in spoken English). Some of our students are qualified nurses in their home country, they have been trained by the college in the following areas of practice following the NVQ framework complementing mandatory training provided by yourselves.

- **Communication**
- **Health and Safety**
- **Well being and protection of individuals**
- **Care planning and person-centred care**
- **Moving and handling**
- **Medication**

Other students will be new to the care sector and therefore need support. We are confident of our high standards. Observations of practical experience are undertaken in the candidate's place of work by a qualified and experienced assessor who will liaise regularly with the manager/owner of the establishment throughout the qualification. This will be continually enhanced along with the theory which is undertaken in the classroom at the college on a weekly basis.
