

The trainee nurses will be of a generally high standard as all our students have to undergo a college internal test before they can be sent out on placement. They will also have passed the **IELTS English language test** at a good level (we require an average score of 6 and a minimum score of 6 in spoken English). **Students eligible for placement should already be proficient at:**

1. **Mixing cements that includes**
 - a. GIC
 - b. Zinc Oxide Eugenol
 - c. Zinc Phosphate Cement
 - d. Calcium Hydroxide Cement
 - e. Polycarboxylate Cement
2. **Infection Control and cleanliness**
3. **Sterilisation and disinfection** (autoclaving instruments and using Ultrasonic bath)
4. **FDI Charting**
5. **Identification of most of the dental instruments** (list of 100) recommended by the National Examination Board (NEBDN)

**Can YOU Afford
To Miss It?**

We are confident of our high standards, as we have a dummy dental surgery (lab) setup in our college where students get hands-on experience and also gets a chance to do role plays many times, hence their development of skills in the delivery of four handed dentistry are remarkably good.
